

# Moving all Zeros to the Left Side of the Array

1. **Moving all Zeros to the Left Side of the Array:** Write a program to move all the zeros on the left side of the array while maintaining the relative order of non-zero elements. You should not use another array.

## Input Format:

- The first line of the input contains the value n.
- The next n lines contains the values of the array.

## Output Format:

- Output the array elements that are separated by spaces.

## Sample Input #1:

```
10
1
2
3
4
5
6
0
0
0
0
```

## Sample Output #1:

```
0 0 0 0 0 1 2 3 4 5
```
